Agitator 16

Self-Contained Carpet Extractor

Increasing Productivity

Looking to increase your productivity? The Agitator 16 is a high-production self-contained carpet extractor and hard floor cleaner.

The Agitator 16 is engineered to clean carpets faster and increase operator productivity and safety. With 60 psi and a wide 16" agitator brush, the Agitator 16 effectively cleans carpet while the powerful three-stage vacuum and wide 16" vacuum shoe removes waste in one easy pass.

The EZ-pull belt is a unique feature designed to improve ease of operation. The EZ-pull belt straps comfortably around your waist to reduce strain on your lower back and shoulders and makes the machine very easy to use.

For hard surface cleaning, you can easily switch to the optional hard floor squeegee and hard floor brush. The quick change hard floor kit option turns your extractor into a dual purpose machine, no tools required. This dual-surface design increases cleaning versatility and eliminates the need for a second machine on the job site.

The Agitator 16 is an ideal carpet and hard surface cleaning machine for public facilities, office buildings, airports, schools, hotels, educational facilities, nursing homes, and others. This machine is tested and certified by the Carpet & Rug institute for cleaning performance.

Key Features:

- Small footprint, light-weight, easy to operate
- Ergonomic design
- High production
- Dual surface functionality with the hard floor option
- Optional onboard spotting hand tool
- Low decibel, only 67 dBA
- Easy to maintain
- Durable rotationally molded PolyDur tanks
- Single cord operation
- Certified by the Carpet & Rug Institute for cleaning performance
