

July 21, 2020

To whom it may concern,

BruTab 6S® and Bru-Clean TbC 2® meet the EPA approved Emerging Virucidal Pathogen (EVP) Claim against SARS-CoV-2 (COVID-19) at 2153 ppm with a 1 minute contact time on a hard, non-porous surface. Follow the directions for use against Norovirus.

These tablets have 3 Emerging Viral Pathogen Claims that meet the criteria for efficacy against SARS-CoV-2:

- Coxsackievirus B3 (4306 ppm @ 1 min contact time)
- Hepatitis A virus (4306 ppm @ 1 min contact time)
- Norovirus (2153 ppm @ 1 min contact time)

The EPA N List shows some but not all EVP claims. Norovirus is a qualifying organism for use against SARS-CoV-2. If you have any questions or concerns, please do not hesitate to contact us.

Sincerely,
