

CleanFreak® Pressure Washer

Hot Water Pressure Washer
(Electric Motor) - 1,000 PSI

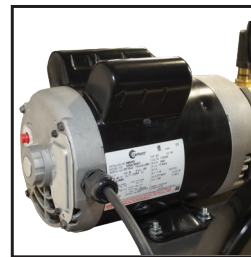

Item#
WET-CFH-3010E

Effective and Efficient

The CleanFreak® diesel-fired, hot water portable pressure washer will empower you to effectively and efficiently wash those pesky irritating jobs away! This model incorporates a heavy-duty 120-volt, 20-amp electric motor and has a triplex ceramic plunger pump. 1,000 PSI, 3 GPM, and a steel frame all contribute to the power and durability of this machine. The poly-molded tank blocks dreaded corrosion formation, and the fuel-conserving, high-efficiency burner significantly decreases fuel and maintenance costs over the lifespan of the unit. Weighing in at 415 lbs., the pressure washer is heavy-duty enough for moderate commercial and residential applications.
