HOW TO ORDER PARTS

Only use CleanFreak supplied or equivalent parts. Parts and supplies may be ordered online, by phone, by fax or by mail.

- 1. Identify the machine model.
- 2. Identify the machine serial number from the data label.
- 3. Ensure the proper serial number is used from the parts list.
- Identify the part number and quantity.
 Do not order by page or reference numbers.
- 5. Provide your name, company name, customer ID number, billing and shipping address, phone number and purchase order number.

PROTECT THE ENVIRONMENT

Please dispose of packaging materials,old machine components such as batteries, hazardous fluids, including antifreeze and oil, in an environmentally safe way according to local waste disposal regulations.

Always remember to recycle.

CleanFreak 3900 N. Providence Ave. Appleton, WI 54913 Toll free. 888-722-5508 Local. 920-882-8453 Fax. 920-380-0878

Specifications and parts are subject to change without notice.

SAFETY PRECAUTIONS

This machine is intended for commercial use. It is designed exclusively to scrub hard floors in an indoor environment and is not constructed for any other use. Only use recommended accessories.

All operators shall read, understand and exercise the following safety precautions:

1. Do not operate machine:

- Unless trained and authorized.
- Unless you have read and understand the operators manual.
- In flammable or explosive areas.
- If not in proper operating condition.
- In outdoors areas.

2. Before starting machine:

- Make sure all safety devices are in place and operate properly.

3. When using machine:

- Go slow on inclines and slippery surfaces.
- Follow all safety guidelines.
- Report and fix any damage to machine prior to operating it.
- Never allow children to play on or around the machine.
- Do not operate on inclines that exceed 2% (3°).

4. Before leaving or servicing machine:

- Stop on level surface.
- Turn off machine.

5. When servicing machine:

- Read operators manual thoroughly prior to operating or servicing this machine.
- Use manufacturer supplied or approved replacement parts.
- Secure machine with wheel blocks prior to jacking the machine up.

- Use approved jack or hoist to safely elevate the machine.

- Avoid moving parts. Do not wear loose fitting clothing while servicing machine.

WARNING: Flammable materials can cause an explosion or fire. Do not use flammable materials in tanks.

WARNING: Flammable materials or reactive metals can cause explosion or fire. Do not pick up.

SAFETY PRECAUTIONS

WARNING:Carefully read and understand this manual before operating this machine.This machine must be grounded!

This scrubbing machine shall be grounded while in use to protect the operator from electric shock. Grounding provides a path of least resistance for electric current. This machine is equipped with a cord having an equipment-grounding conductor and grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances. Do not remove the ground pin under any circumstances.

This machine is for use on a nominal 110-volt circuit and has a grounding plug that resembles the plug illustrated in Figure. Make sure that the machine is connected to an outlet having the same configuration as the plug. No adapter should be used with this machine.

This machine is intended for commercial use. It is constructed for use in an indoor environment and is nor intended for any other use. Use only recommended accessories. 1. Do not operate machine:

- Unless trained and authorized.
- In flammable or explosive areas.
- With a damaged cord or plug
- If not in proper operating condition.
- 2. Before operating machine:

- Make sure all safety devices are in place and operating properly.

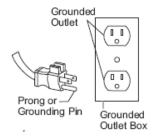

- 3. When using machine:
- Do not run machine over cord.
- Do not pull cord around sharp edges or corners.
- Do not handle plug with wet hands.
- Report machine damage or fault operation immediately.
- 4. Before leaving or servicing machine:
- Turn off machine.
- 5. When servicing machine:
- Unplug cord from outlet.

- Unless you have read and
- understood the operator's manual.
- With the use of extension cords.
- In outdoor areas and standing water.

- Do not pull machine by cord or plug.
- Do not unplug by pulling on the cord.
- Do not stretch cord.
- Keep cord away from heated surfaces.
 - Unplug cord from outlet.
- Use manufacturer supplied or approved replacement parts.

WARNING: To avoid electrical shock, please replace the power cord immediately if any damage is being detected. The replacement must be performed only by an authorized person or by our customer service center.

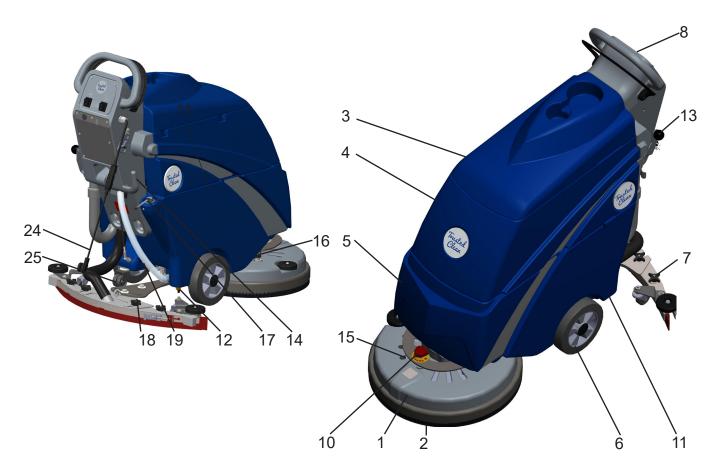

WARNING:Flammable materials can cause explosion or fire. Do not use flammable materials in tanks or pick them up.

MACHINE COMPONENTS

20 23 21

- 1. Brush cover
- 4. Recovery tank
- 7. Squeegee
- 10. Adjusting handle
- 13. Squeegee lifting handle
- 16. Brush plunger
- 19. Clear tube
- 23. Circuit breaker

- 2. Brush
- 5. Solution tank
- 8. Control box
- 11. Water filter
- 14. Power cord hook
- 17. Plug of water filling port
- 20. Switch for brush motor
- 24. Power cord

- 3. Cover tank
- 6.8" wheels
- 9. Trigger
- 12. Ball valve
- 15. Brush/pad driving hub
- 18. Knob
- 21. Switch for vacuum motor
- 25.support wheel

MACHINE SET UP & INSTALLATION

UNPACK MACHINE:

Be sure and check packing carton for any damage. Immediately report any damage to carrier. Be careful not to let machine vibrate while carrying, Check contents of package to ensure that the following items are included: Machine, squeegee assembly, brush/pad driver.

MACHINE SET UP & PRE-OPERATION CHECKS:

1) Sweep the outside of the machine.

2)Check that squeegee and brush / pad is properly installed.

3) Theforwardspeed of machine can be controlled by turning the handle(10). Turn the handle clockwise to speed up machine. or turn the handle anticlockwise to slow down machine.

4)Makesuretheworkingsurfacecan support the machine weight, thegradient of the floor can't exceed the limit that machine allowed(2%).

INSTALLING PAD DRIVER OR BRUSH:

1) Turn off machine.

2)Tiltthemachine backwards,line upthe driving hub with the hole of brush or pad driver, make sure the three blocks are fitted into the three slots of the drive hub.

*If a pad driver is being used, the appropriate pad should be attached to the pad driver first.

3)Pushtheplungerwhichon the brush cover to prevent the driving hub from rotating,then spin the brush/pad clockwise with your another hand till the clip clamp the block on the brush/pad.

INSTALLING THE SQUEEGEE:

1)Loosen the twoknobs(18) on the squeegee and slide the squeegee into the slots at the rear of the squeegee bracket. (the wheels on the squeegee point to the machine.)

2) Tighten the knobs securely.

FILLING THE SOLUTION TANK:

1) The fill port is located at the rear of machine, pull the plug out of the hole.

- 2) Fill solution tank with water. (use a hose which link to a water faucet, water temperature should not exceed 50° C) The clear tube(19) in the back right of the machine has gallon markers to help determine the water level in the solution tank(5).
 - *Depending on the dirty level of the ground, add the proper amount of detergent into the solution tank.

WARNING:Do not put any flammable materials into solution tank. This can cause an explosion or a fire. Only use recommended cleaning chemicals. Contact your janitorial supply distributor for recommendations on proper chemicals.

MACHINE OPERATION

WARNING:Do not operate machine unless you have read and understand this manual.

- 1) Lower squeegee assembly to the floor by spin the squeegee lifting handle(13).
- 2) Turn brush motor switch(20) to "on" position.
- 3) Turn vacuum motor switch(21) to "on" position.
- 4) Rotate the ball valve(12) handle to vertical position. Solution will not begin to flow until the operating triggers (9) are pulled.

5)To begins crubbing,pull on the blue operating trigger(9), when this triggers is pulled, the pad driver will begin to spin and the solution will begin to flow.

6) Begin scrubbing by moving the machine forward.

7) Adjust solution flow by adjusting the position of ball valve knob.

WARNING:Do not keep the machine in the same position with the pad / brush spinning, or you might damage the floor.

WHILE OPERATING MACHINE

1)Occasionally open the cover tank(3) to see if there is any foam build-up.If excessive foam is found, add defoamer to the recovery tank.

WARNING:Foam must not enter the float shut-off screen, or damage can occur to the vacuum motor. Foam will not activate the machine's float shut-off device.

2)Occasionally view the clear tube at the back left of the machineto check thea mount of cleaning solutionthatis left in themachine. If the squeegee assembly leaves streaks on the floor, raise the squeegee off the floor and wipe the blades down with a damp cloth.

WARNING:Do not use your fingers to wipe or remove debris from the blades, as injury may occur.

When the solution tank runs empty, turn off the brush switch and ball valve of solution tank. Keep the squeegee down and continue to vacuum until all the dirty water is picked up.

TANK DRAINING

- 1) Turn the switches on the control panel to "off" position.
- 2) Raise the squeegee, transport machine to approved area for draining tank(s).

WARNING: Any time scrubbing is completed, or when refilling solution tank, the recovery tank should be drained and cleaned.

WARNING: If the recovery tank is not drained when the solution tank has been refilled, foam or water may enter the float shut-off mechanism and cause damage to the vacuum motor.

DRAINING THE RECOVERY (DIRTY) TANK

1) Remove the drain hose from the holder, and place the drain hose over the floor drain. Twist off the drain hose plug to begin the draining process.

2) Clean the recovery tank after every use. Use a fresh water hose to rinse out the recovery tank. Be careful not to spray water into the float shut-off mechanism.

WARNING: If you are storing the machine for any period of time, keep the cover tank open so the tank can dry completely and smell fresh.

DRAINING THE SOLUTION (CLEAN) TANK

WARNING: Any time scrubbing operation is completed, the solution tank should be drained and cleaned.

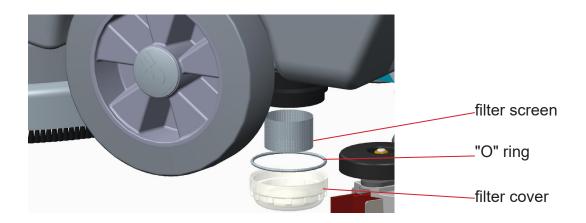

1) Pull down on the clear tube (back left of the machine) to remove it from the hose barb. This will allow the solution to flow freely into a bucket or floor drain.

2) Rinse the solution tank with clean water after every use. This will help prevent chemical buildup and clogging of the solution lines.

3) Once tank is rinsed, flushed and drained, reconnect the clear tube to the hose barb. Be sure the tube is pushed all the way up on the hose barb.

4) Screw off the cover of the water filter(11) to compeletly exhaust the tank and check the filter screen, clean it up if necessary.

5) Screw up the cover of the water filter(11), bu sure to install the screen and the "O" ring in the correct position.

PREVENTATIVE MAINTENANCE

WARNNING: Before performing any maintenance on the machine, be sure that the power is turned off, or the batteries are disconnected!

WARNNING: Repairs are to be completed by authorized service centers only. Any repairs completed by unauthorized persons will avoid the warranty.

DAILY MAINTENANCE

- 1) Remove pad driver / brush and clean with approved cleaner.
- 2) Drain recovery and solution tanks completely and rinse out with clean water. Visually check the recovery tank for debris and clean out as necessary.
- 3) Raise squeegee assembly off floor and wipe it down with a damp towel. Be sure to store the squeegee in the up position.
- 4) Remove the float shut-off assembly and rinse it out with clean water.
- 5) Clean machine with an approved cleaner and a damp towel. Don't spray water to clean the outside of machine to avoid damage to motor and wiring.
- 6) Unplug vacuum motor from power source and hose cuff & remove the drain hose from the holder prior to removing the recovery tank when performing maintenance.
- 7) Check the condition of the squeegee blade wiping edge, rotate blade or replace it if worn.

MONTHLY MAINTENANCE

- 1) Inspect and clean the recovery tank cover seal. Replace it if damaged.
- 2) Lubricate all grease points and pivot points with silicon spay and approved grease.
- 3) Check the machine for loose nuts and bolts.
- 4) Check the machine for leaks.

MOTOR MAINTENANCE

- 1) Contact your local CleanFreak Distributor for any motor maintenance.
- 2) Check the motor brushes every 250 hours, Replace the brushes when they are worn to a length of 10mm or less.

MACHINE STORAGE

1) Always store the machine indoors and in its upright position.

- 2) Always store the machine in a dry area.
- 3) Always take off the pad driver / brush before storage.

4) Always store the machine with the squeegee assembly raised off the floor.

5) If storing in an area which may reach freezing temperatures, be sure to drain all fluids from the machine prior to storage(include the filter). Any damage caused by freezing temperatures will not be covered by the warranty.

6) Drain the recovery tank and keep the cover tank open so that it can "breathe" during storage.

7) Drain the solution tank of all fluid.

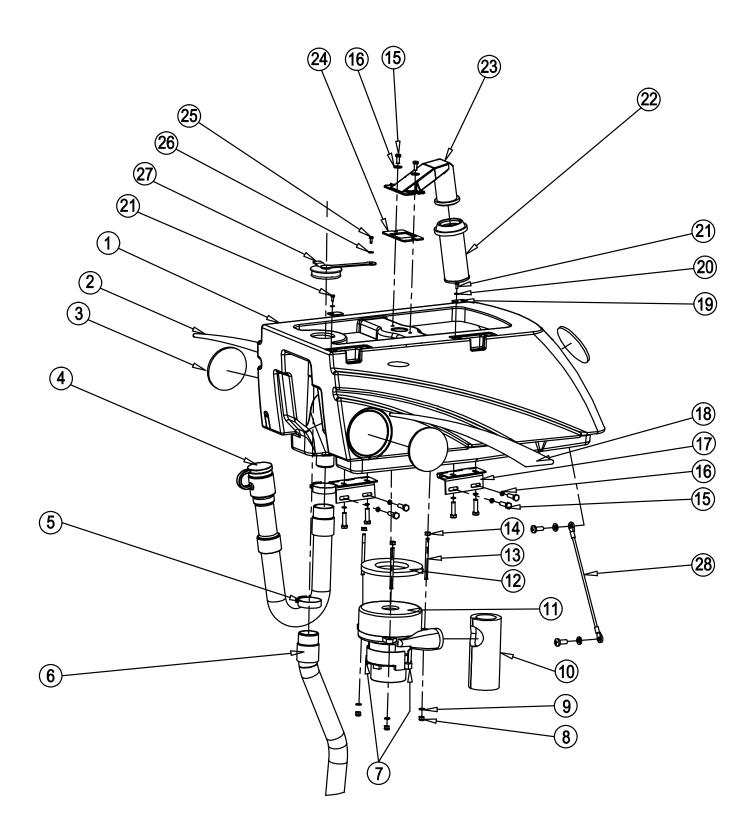

BASIC TROUBLESHOOTING

| PROBLEM | CAUSE | SOLUTION |
|-----------------------|---|---|
| No Dowor | The wiring not connected correctly or bad wiring | Check the wiring or contact CleanFreak Distributor |
| No Power | Bad brush motor | Contact CleanFreak Distributor |
| | Carbon brushes worn out | Contact CleanFreak Distributor |
| Vacuum motor does | The wiring not connected correctly or bad wiring | Check the wiring or contact CleanFreak Distributor |
| not run | Bad vacuum motor | Contact CleanFreak Distributor |
| | Carbon brushes worn out | Contact CleanFreak Distributor |
| | Bad ball valve | Contact CleanFreak Distributor |
| Little or no | Bad solution valve | Contact CleanFreak Distributor |
| solution flow | Ball valve position in need of adjustment | When ball valve is in horizontal position,the amount of solution flow is maximum. |
| | Squeegee clogged | Clean debris off squeegee with a damp towel |
| | Squeegee blades worn | Install new squeegee blades |
| | Squeegee not mounted correctly | Confirm that the squeegee assembly is securely fastened to the machine and not loose fitting. |
| | | Check hose connections and make sure they are firm. Replace hose if damaged. |
| | Vacuum hose may be clogged | Check hose for debris and remove any clog. |
| Poor water pick up | Drain hose stopper is loose | Tighten drain plug. |
| plot up | Vacuum motor is loose | Tighten vac motor mounting screws. Do not over tighten or damage will occur. |
| | cover tank is loose | Confirm the cover tank is securely in its place. |
| | Recovery tank is full | Drain recovery tank |
| | IFIOAL SOLL OT IS CLODDED | Remove float shut off from inside recovery tank and remove any debris |
